

## GRAND ENTRANCES

First impressions count, which is why the choice of door for your property, be it newbuild or refurbishment, is an important one.

As individual as your customers, Masterdors are made to measure. Each high performance, timber bladed door-set, is made to your exact specification, from size and colour to the position of the letter plate, allowing you to create truly memorable entrances.

Far from being just a pretty face, Masterdors are approved by Secured by Design and Sold Secure, exceed PAS23/24 BSi tests, meet the requirements of Part M of the Building Regulations, and fire-check versions have also been successfully tested to BS476 Part 22.
